# 2025 Tax Summary

The Setting Every Community Up for Retirement Enhancement (SECURE) Act of 2019 and the Consolidated Appropriations Act of 2023 increase the age for required minimum distributions (RMDs) for all qualified retirement plans to age 73 in 2023. IRA owners who were born June 30, 1949 or prior must continue to take RMDs under the previous rules. The required minimum distribution (RMD) for any year is calculated as the December 31 value of the prior year (plus the actuarial present value of any additional benefit provided within the annuity contract) divided by the RMD factor from the appropriate table.

### Uniform Lifetime Table<sup>2</sup>

### For use by:

- · Unmarried IRA owners
- · Married IRA owners whose spouses are not more than 10 years younger
- Married IRA owners whose spouses are not the sole beneficiaries of their IRAs

(For married IRA owners whose spouses are more than 10 years younger, use Joint Life Table from Treas. Reg. 1.401(a)(9)-9(c))

## Single Life Expectancy Table<sup>3</sup>

## Spouse beneficiary

IRA owner dies on/after Required Beginning Date (RBD): Beginning in the year following the year of the IRA owner's death, recalculate spouse beneficiary's single life expectancy each year while spouse beneficiary survives, using spouse beneficiary's age on birthday in that calendar year. If RMD would be less, spouse beneficiary would use IRA owner's term certain life expectancy. For that, use IRA owner's age attained on the birthday in the calendar year of IRA owner's death. Reduced by one for each passing year. (Note: Spouse beneficiary could instead roll over to his or her own IRA at IRA owner's death.) New in 2024: A surviving spouse may elect to be treated as the deceased owner for purposes of the RMD rules.

**Death before RBD:** Same options as above, minus using IRA owner's term certain life expectancy, plus spouse beneficiary can delay until IRA owner would have turned age 73.

### Nonspouse beneficiary<sup>4</sup>

**Death after December 31, 2019:** The stretch IRA option will be replaced with a 10-year rule for the vast majority of nonspouse beneficiaries. The rule will require assets to be liquidated by the end of the 10<sup>th</sup> year following the year of death of the IRA owner. According to the final Treasury Regulations "Rules and Regulations FR-2024-14542", in some circumstances, such as when the IRA owner died on or after their RBD or after an eligible designated beneficiary who was receiving life expectancy payments dies, RMD payments must be satisfied each year until the entire death benefit is distributed within 10 years. There are some exceptions if the nonspouse beneficiary is a minor, disabled, chronically ill, or not more than 10 years younger than the deceased IRA owner. For minors, the exception only applies until the child reaches age of majority, at which point the 10-year rule is enforced.

# Death prior to December 31, 2019

**Death on/after RBD:** Beneficiary uses beneficiary's own term certain life expectancy. For that, use the beneficiary's age attained on the birthday in the calendar year after the calendar year of IRA owner's death. Reduce by one for each passing year. If RMD would be less, beneficiary would use IRA owner's term certain life expectancy. For that, use IRA owner's attained age in the calendar year of IRA owner's death. Reduce by one for each passing year.

**Death before RBD:** Same options as above, minus using IRA owner's term certain life expectancy, or beneficiary can defer all distributions as long as all funds are distributed in five years.

## No designated beneficiary

**Death on/after RBD:** Inheritor uses IRA owner's term certain life expectancy. For that, use IRA owner's age attained on the birthday in the calendar year of owner's death. Reduce by one for each passing year.

Death before RBD: Distribute all within five years.
